Art Unit: 1502

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 1, 2, 5-7 are rejected under 35 U.S.C. § 103 as being unpatentable over Balasz.

Balasaz teaches applying hyaluronic acid for protecting tissue during surgical manipulation (column 15, lines 3-9). 0.5% solutions at a molecular weight of 750k are disclosed (column 3, lines 50-53).

It would have been obvious to apply hyaluronic acid to tissue ^{for} ~~of~~ the beneficial effect of protection in view of Balasz.

As to the claimed treatment prior to manipulation, Balasz's teaching of protection during surgical administration indicates application prior to manipulation.

No claims allowed.
